*Dharma Circle Summary April 2022*

---

Only Erotic Mystics can make a Revolution:

To make the revolution, there are two conditions: we must feel the flutter in our heart, and we must feel the overwhelming need of the world.

Both conditions imply that we are able to access the Eros of our days, regardless of any fatigue and exhaustion we may feel. Enlightenment is the willingness not to give in to the exhaustion. We can hold it in compassion but we don't let it define who we are.

From that place, we can continue to be creative, erotic mystics, meaning we are living one moment to the next, with this enquiry:

- How do I open to what exists in this moment right now?

Or said differently:

- What does reality need from me in every second?

An inquiry is not an informational question, but a question about the essential nature of Reality itself, a question upon which all answers depend.

When I ask myself moment to moment what does reality need from me, I am not taking anything for granted, and I'm taking responsibility for my arousal.

I am approaching the dharma like a virgin: always for the very first time.

When 50 of us are engaged in this enquiry together in Symphony, this is what changes the world.

Each one of us in this lifetime is enjoying the enormous privilege to be in a place of the world and in conditions where we participate in *Unique Self Symphony*.

There's always an external reason not to be aroused. As Erotic Mystics we take responsibility for our own arousal and we arouse everyone around us!

Let us become these fifty righteous people who take responsibility for our own arousal.

We make this Unique Self Symphony ours! There's no greater joy than participating in this aroused field of a Unique Self Symphony.
